

## Company Overview

Our mission is to offer state-of-the-art dental rehabilitation products – making patient-experience better.

By utilizing our orthodontic and engineering know-how, we at BHdental develop advanced and affordable implants and accessories, designed for the 21<sup>st</sup> century.

## Bringing Excellence to Dental Care

BHdental is a professional and inspiring company founded by a team of highly skilled medical and orthodontic engineers and business development experts, bringing vast knowledge, experience and engineering novelty coupled with a new business approach to the dental care market. BHdental offers high quality dental implants, prosthetic components, and surgical accessories optimizing the dental implant practice.

Represented in Latin-America by Bio Teeth S.A. BHdental offers this market with affordable, quality managed products and world-class sales support.

## Meeting the Key Challenge of the Dental Implant Market

The dental implant market is rapidly growing. In recent years the availability of high quality esthetics and improved dental treatments, together with the increasing aging population and the rising awareness for oral health, are driving the growth of the market. However, the key challenge that is limiting market growth is the high cost of the dental implants.

Capitalizing on the diversity of the company's technological and business expertise BHdental is capable of offering high-quality, easy-to-use dental implant components and accessories at a very low-cost.

## BHdental Product Lines

### Dynamic Dental Implants

In addition to the company's basic implant product family, enabling best bone grip and compression, BHdental also offers customized products in extreme cases that require cutting-edge mechanical engineering know-how, coupled with superior experience in utilizing advanced 3D imaging technology.

### Wide Range of Dental Prosthetics

BHdental offers various dental prosthetics for implants from standard and anatomic abutments through standard anatomic angular abutments up to different types of plastic cylinders, healing caps, clips as well as locking and compression screws to enable quick dental implant practice.

### Surgical Tools & Accessories

Based on its mechanical and clinical knowledge, BHdental provides a comprehensive set of implant surgical tools & accessories. BHdental offers surgical implant site & gingival depth measuring tools, ratchets and surgical implant accessories such as hex drivers, various types of implant motor adapters and drills.

### All-inclusive Dental Implant Kit

In order to facilitate dental implant surgery BHdental has developed a modular case designed for dental surgery tooling and accessories that can be stored and used whenever necessary. Using this method saves time and space in the dental clinic.

## BHdental Vision

BHdental brings both new business modeling and technological advances to the growing dental care market, providing the dental medical team with top of the line products to make patient-experience better.
